Dear Dr. Jim:

Enclosed is check and some magazines. Somehow or another I goofed on sending the magazines. Things were a little hectic around here for awhile and I guess that my pea brain wasn't functioning. Hope we are back on an even keel now for awhile at least.

Carl is giving your letter concerning your upcoming speech some thought, (he says) and I expect you will hear from him one of these days. I think your position with the Historical Society is an honor, right? Anyhow we are telling people that the man who writes the articles is a celebrity.

From the looks of the weather map, you have had some very nasty weather in Atlanta? We are having the same heat wave, but it does cool at night so we can't complain too much.

We are in the throes of changing personnel at the printers again, so the earlier we can have No. XXII the better. Doesn't seem possible that we have run that many. Is going to make a might fine looking bound volume I'm a thinking. Keep us posted.

Sincerely,

[Signature]

P.S.

770 magazines in the office will get some from the printer forward before the week is out.
