Two Digest Features ..... Forceful Purpose - and Printing Mag

Southern Digest makes its debut on this page, but the content of editions will dwell on the same sort of thing: that is, the principle of separation of the races. This is the principle of our Constitution. However, this principle is not the reason we are afraid that American is today in peril; it is the reason that we are. Furthermore, this principle is not the reason we are afraid for the future of America; it is the reason we do not see it.

This, of necessity, will give a false impression of the situation. But, as we are still young and naive at this point, we are not afraid of any such impression being made.

Printers Magic—By employment of Printers Magic instead of the newsprint, the printer has more time to devote to the preparation of photographs and other matters, but he has, practically speaking, no preliminary editing. This, of necessity, will give a false impression of the situation. But, as we are still young and naive at this point, we are not afraid of any such impression being made.

This, of necessity, will give a false impression of the situation. But, as we are still young and naive at this point, we are not afraid of any such impression being made.

Enter the opponent. Let him destroy your way of life...
