Dear Student and C.A.P.

"The kingdom of heaven is within you," the Bible says. You certainly are giving a false impression to the world because there are many college students in U.S. who attend to graduate to some knowledge and then go teach in a Negro college. This is murder because of being stubborn about a certain school.

There are many white people who might like but in different schools because of ability or finances can't be and is also any more serious.
